

Partners for Fish and Wildlife Program in NE Colorado
(PFW)

Working with private landowners to provide technical assistance and up to 75% cost share on private land projects for, or in conjunction with wildlife habitat benefits.

- No public access requirement
- No Adjusted Gross Income threshold
- Can provide project funding match with other agency's or partner programs

Such as: USDA Natural Resources Conservation Service (WRP, WHIP, EQUIP), Ducks Unlimited, Pheasants Forever, Colorado Parks and Wildlife, Rocky Mountain Bird Observatory, Conservation Districts, etc.

- No formal funding cycle for PFW only projects
- If contractors are needed for constructing projects, they work for the landowner not USFWS
- All landowner obligations are included within user friendly agreement, agreement length is for 10 years

Depending upon project type, private land benefits could include:

Riparian Fencing/Grazing Plans

Rangeland Fencing

Livestock Water

Spring Improvements

Wetland Restorations

Wet Meadow

Shallow water projects (Augmentation ponds)

Invasive woody removal in riparian areas (Russian olive, Salt cedar)

Native Grass Planting

Water control structures

Playa projects

PFW strives to maintain a working relationship with landowners and to work on different projects every few years, within the same property setting. This provides sustainable wildlife benefits and decreases land improvement budget for landowners.
